MEINFERNBUS FLIXBUS

MeinFernBus FlixBus

Task: create high quality solution for transportation company:

1. Software to manage company efficiently
2. Website for passengers to buy tickets and travel easily

Solution for company management:

- powerful and flexible company management system written in Symfony
- travel planning
- passenger volumes monitoring
- profit optimization tools
- buses movement monitoring via Geographic Information System

Solution for passengers:

- improved and easy tickets search
- high informative results
- precise routing maps
- digitalized ticket-free boarding
- application to access information everywhere

Nova Poshta

Shopping

Task: create completely new efficient website to boost sales.

Challenge was doubled by short terms of the project.

Solution:

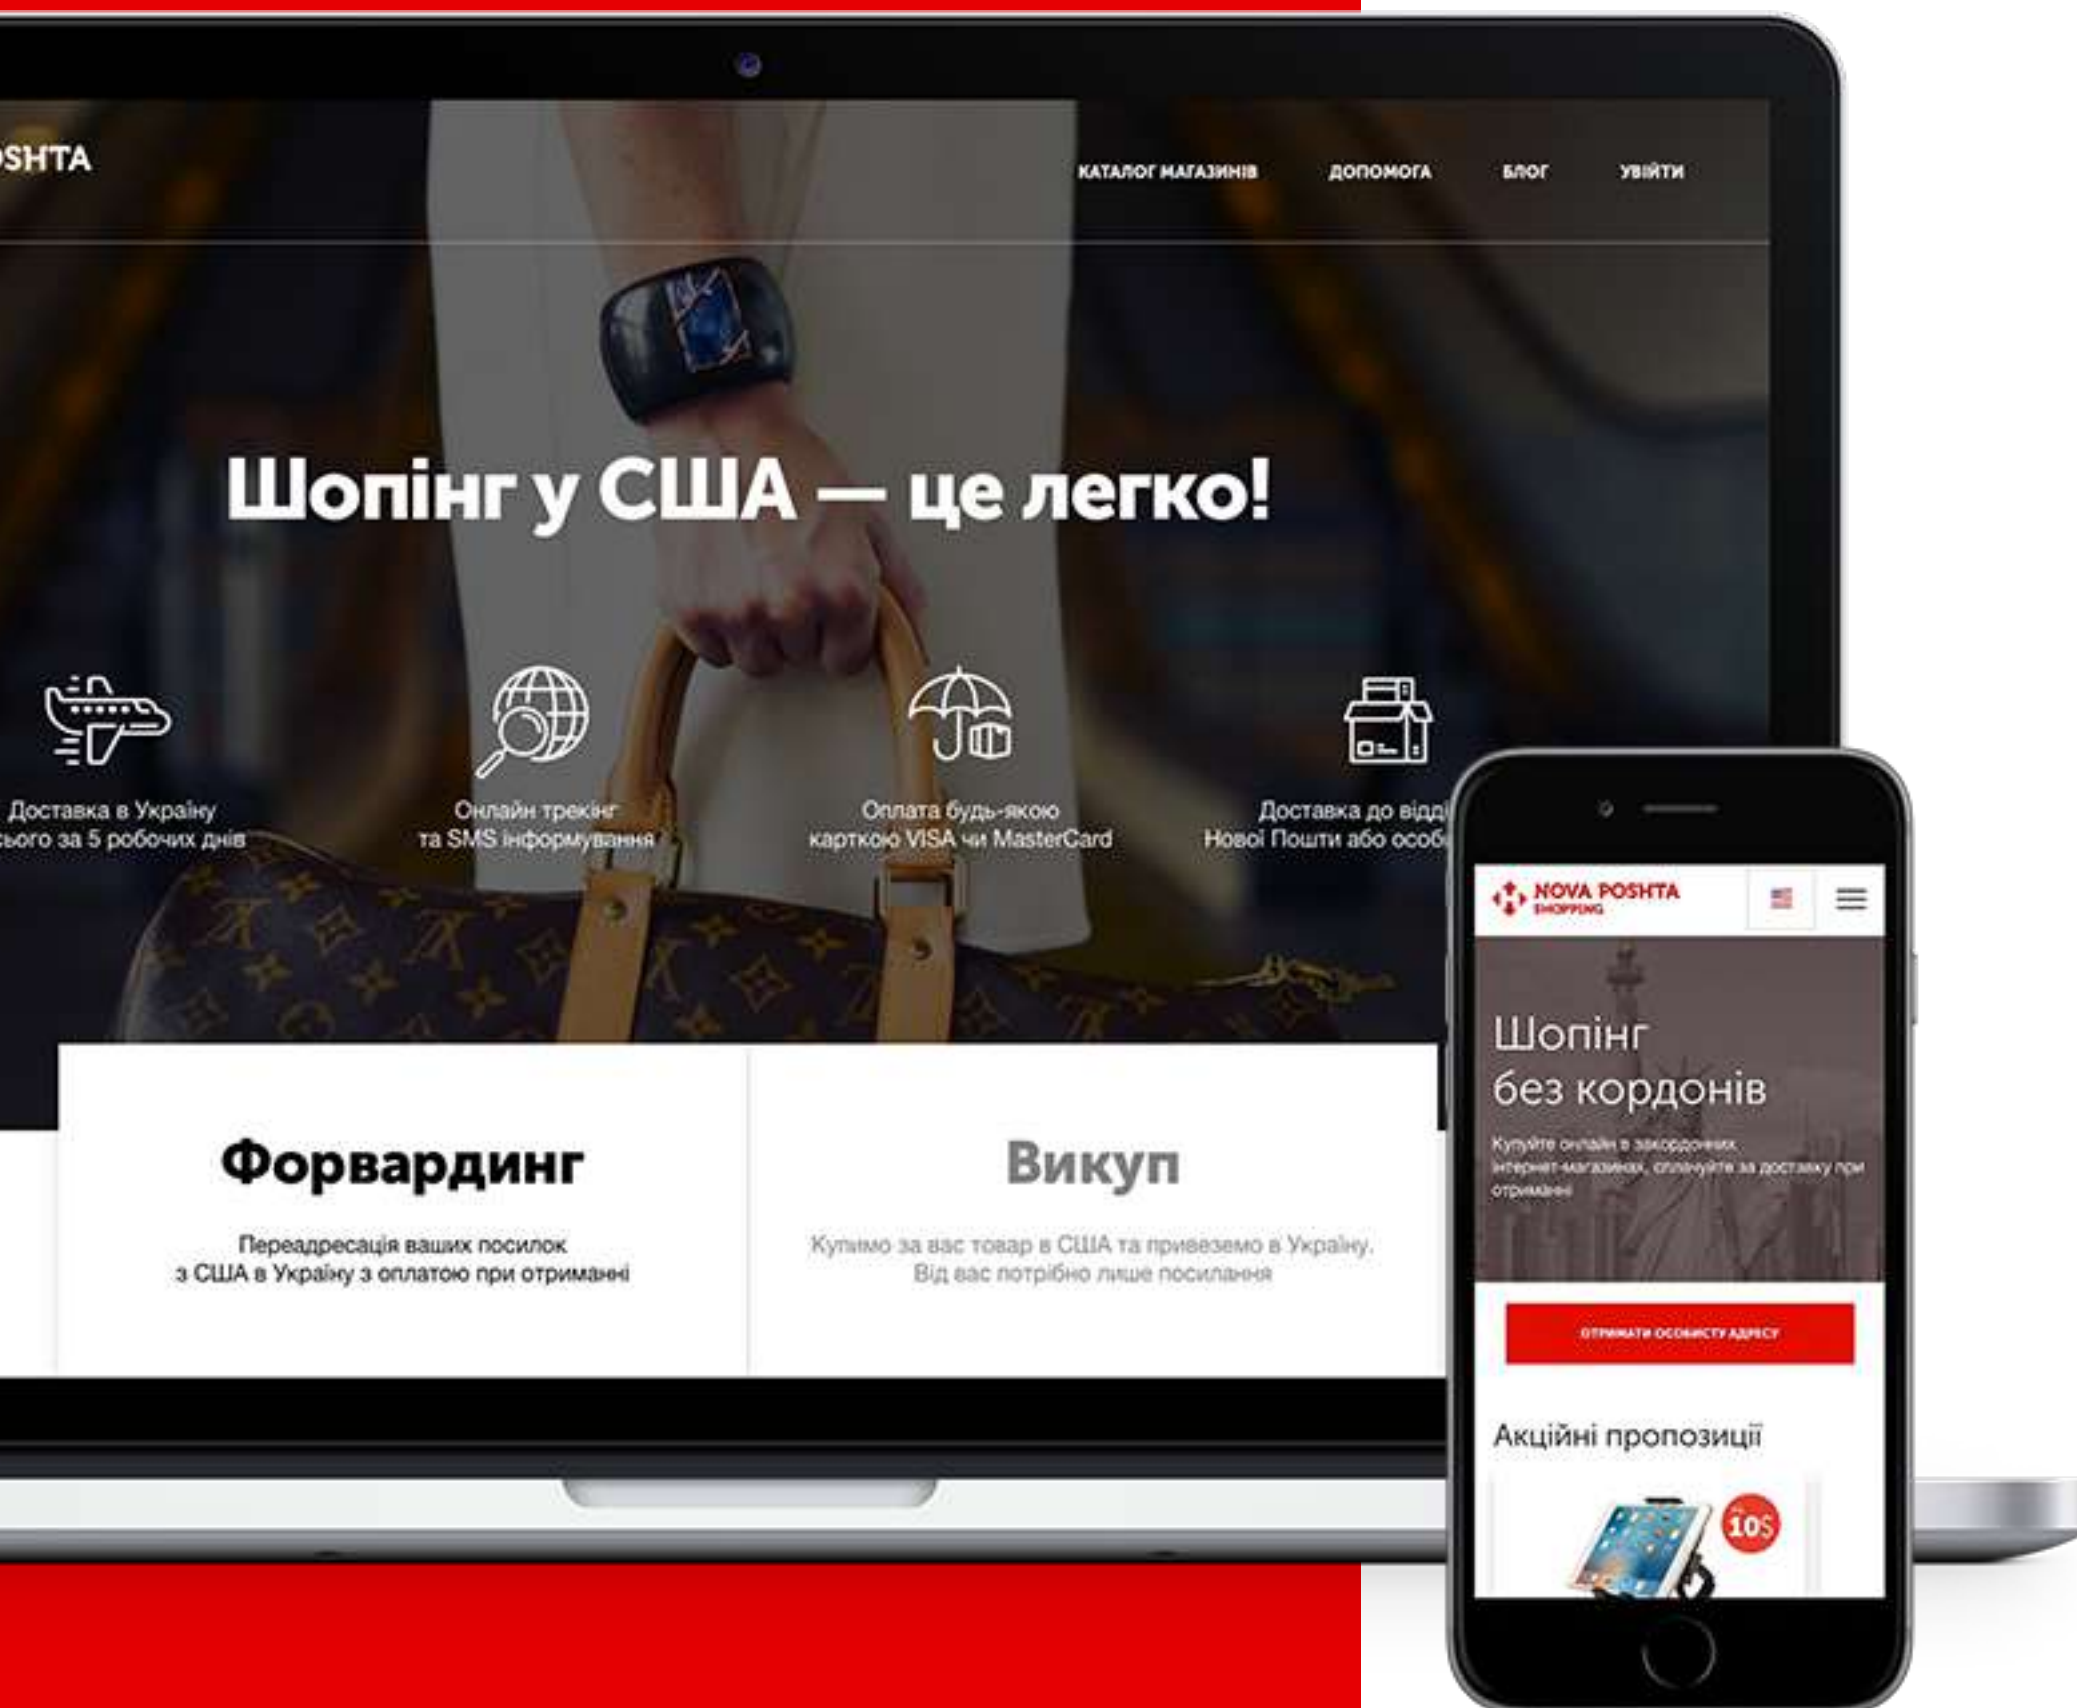

- Completely redesigned homepage
- New software engine written in Symfony
- Custom admin dashboard
- Dashboard for warehouse operators
- Multi-domain, multi-template and multi-language
- Integrate website with external NPI (SOAP) service

Results speak for us. First week of launch:

7 927
new users

2 024
orders placed

\$130 000
declared by users

SmartSeeds

Task: Develop service that integrates 3 different user roles in one business process to organize cargo transportation on request.

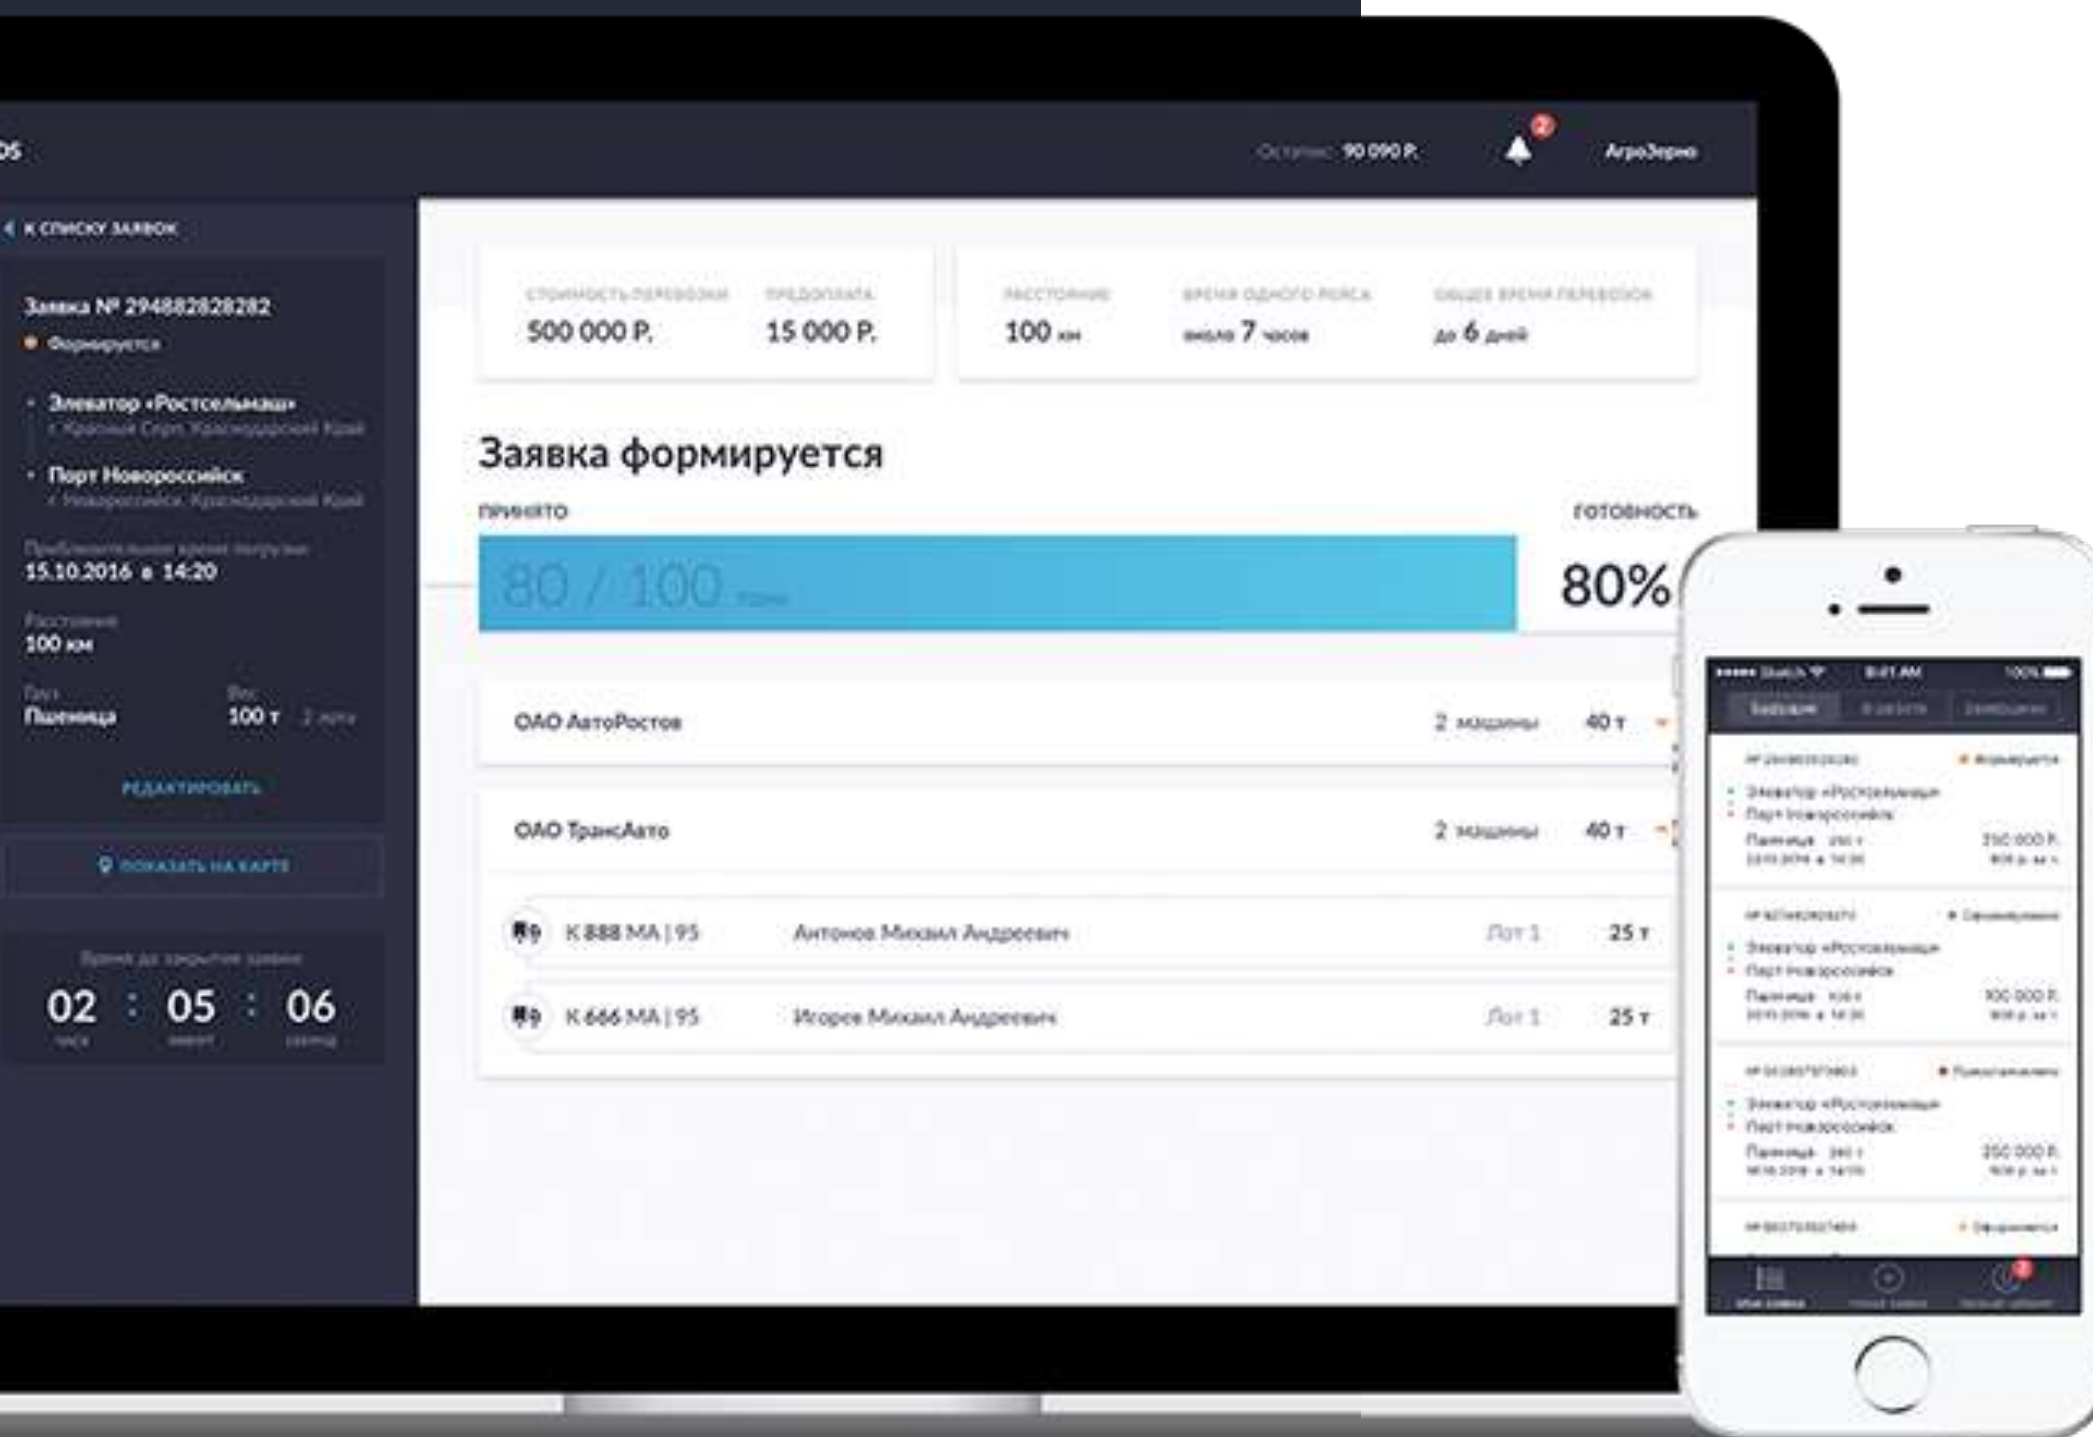

Solution:

For complete implementation of business logic we used PHP-framework Symfony.

In order to make development process most efficient we divided it in following components:

- API as heart of system where all transactions are performed
- Interface for clients (frontend) to manage request from private accounts
- Interface for administrators (backend) to operate the system
- GIS to follow vehicles' positioning and stage of request
- Mobile apps for cargo owners and drivers

We implemented MVP consisting basic functions that let service to be launched in time, show itself on the market and attract first users, register vehicles and drivers in the system and create and calculate first requests.

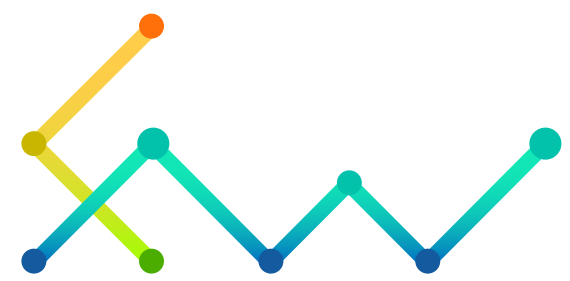

Message from CEO

"We have perspective vision and develop solutions that will efficiently serve your business in the long run."
